

NATIONAL IDEA - OUR IDEA

Khazratqulova Parvina

2nd year student of the Faculty of History

Abstract:

This article contains actual thoughts about the fact that the national idea is our idea. In addition, the issue of spirituality is also shown as a priority issue.

Keywords: National idea, consciousness, spirituality, culture, method, tool, young generation, traditions, sense of the Motherland.

What are the factors that threaten the consciousness of the young generation? First of all, foreign ideas for us! This is especially true in the current era of globalization. After all, the processes taking place in the world, in the environment of fierce competition, the struggle between ideologies is becoming more and more intense. As a result, destructive ideas are spreading and unhealthy views are growing. So how do you combat it? Of course, with the national idea! The fact that the issue of spirituality has become one of the most urgent tasks in our society is the result of this need. After all, the factor that truly makes a nation a nation, unites and harmonizes, is the national identity! In order not to lose our national spirituality, ancient values and traditions, we need the national idea like water and air.

Imagine: if someone comes and hurts our child, our brother or sister unjustly, and throws stones at him, how much will we be upset? Naturally, some kind of internal force, a hidden impulse urges us to act. We immediately go to protect our loved ones. –There should be a similar strong bond between the motherland and each of its children. The only way is to love the Motherland! Watering the soul with spirituality! Deep understanding of national identity! Feeling the responsibility to the country and the nation! What do these qualities give a person? Maturity, national growth, national pride, let's say the total of good qualities... Consequently, it gives strength to the development and reforms of the Motherland.

Unfortunately, there have been a lot of problems in this regard in recent years. Because we approached the field of spirituality and enlightenment from one side. As a result, the promotion of the national idea and spirituality in our country was abandoned.

For this reason, the President of the Republic of Uzbekistan issued two important documents in this direction this year - the order on April 8 "On measures to develop the concept of the development of the national idea at a new stage of Uzbekistan's development" and on May 3 "Additional order on increasing the effectiveness of spiritual and educational work" signed the decision on measures.

In addition, under the chairmanship of the head of our state, on August 14 of this year, the discussion of the work carried out in the first half of 2019 on the socio-economic development

of our country, and the extended meeting dedicated to the priority tasks that ensure the achievement of the parameters of the forecast by the end of 9 months and the end of the year special emphasis was placed on the analysis of these issues at the meeting. The conclusions drawn, the brief essence of the tasks that cannot be postponed are as follows: it is permissible to carry out a lot of practical work on the development of the moral and ideological foundations of our society based on the idea of "from national recovery to national growth" using the missed opportunities in this area. After all, if we do not ensure the sustainability of our people, our state, each of us, our own future, someone from abroad will not do it for us. In this regard, we were interested in the opinions of industry officials, experts, and public representatives.

The path to ascension. A person deserves respect for being a person! Our great thinker, Alisher Navoi, said, "I will find you, if I do not find myself," he said that every person can appreciate, understand and develop himself, and only then will he be known, recognized and respected. In the context of today's rapidly changing relationships, "Profit, as Adam Smith said, is not a driving force, but a destructive force." So, who are those who trample and humiliate people in pursuit of profit and direct this creative force to destruction? What about the self-deprecating ones? Aren't people themselves? In Uzbekistan today, large-scale reforms are being implemented in order to solve the problems of the population and improve the welfare of our compatriots. In order to solve and provide for the painful problem of people, which has been neglected for years - the need for housing, the number of residences built in recent years has exceeded the number of buildings built after the 1966 Tashkent earthquake by 10 times! This is not due to the increase in the income of the state, but the reforms that are being carried out to meet the basic needs of citizens, no matter how difficult it may be. Simply put, it is a difficult path chosen to restore human dignity. Attracting the population to entrepreneurship and creating a permanent source of income has also become a priority. For this purpose, preferential credit lines are being opened for our people. State programs to attract the population, especially young people, to entrepreneurship are being adopted through special state funds. Villages or neighborhoods that have turned into ruins are being turned into cozy and prosperous places. After all, how correct is it to talk about ownership of the Motherland to a person who does not have his own shelter? After all, when a person begins to respect himself, then his attitude towards his children, those around him, and his country will change. Besides, a person who respects himself will definitely be disciplined. He obeys the laws he approves. The law is a mutual agreement between citizens. The system of registration, formalization, implementation and control of the implementation of this agreement - the public control, which is equally understandable to everyone, determines the level of perfection of the society and, in turn, the place of the state in the world community. A society with discipline and mutual respect will quickly find the way to progress and make steady progress on this path.

Who does not want to live in peace, prosperity and peace? But where is the way to achieve this? In man himself! After all, he builds his own life. He acquires knowledge, learns a profession and brings meaning to his life with good deeds.

In this sense, citizens' determination of their rights and obligations, their understanding and compliance with them are the guarantee of a peaceful and prosperous life. President Shavkat Mirziyoyev said that "Ensuring the rule of law in society is a guarantee of the effectiveness of all the reforms being implemented, it is the most important factor in improving the standard of living of the population, ensuring peace, harmony and stability in the country." Of course, –Motherland is necessary for a person. It is also necessary for him to realize his dreams and hopes! Motherland is a blessed land where a person was born and grew up, where his ancestors lived, and where it is necessary to ensure the peaceful and peaceful life of his descendants. You can't choose your country, just like you can't choose your parents. Therefore, gratitude begins with realizing the feeling of Motherland. A person can live and develop far from the place where he was born and raised, from his country, but he cannot wish harm to his country and fellow citizens.

Therefore, a person can make plans for development and advancement only in a society where he is valued. Because national progress is the result of the joint action of conscious, selfless and loyal people who understand and appreciate themselves, their identity, the Motherland and their compatriots.
