Mavlanova Sojida Shodiyarovna

Jizzakh State Pedagogical Institute, Master of Preschool Education

Annotation: As in any profession, the foundation is laid during the student years for the creative abilities of future educators and is consistently developed in the organization of professional activities. This article discusses the creative features of a modern educator.

Keywords: creativity, world culture, national culture, spiritual maturity, physical health, special pedagogical, psychological specialization, thorough knowledge, self-improvement.

The radical reforms being carried out in the country today are aimed at improving the norms and rules of positive behavior of the generation, the basis of scientific knowledge, professional skills and abilities in preschool education, academic lyceums and vocational colleges and universities. requires careful consideration in all aspects. For this purpose, the tasks are set for the comprehensive development of the younger generation, the restoration of our national values, spirituality, acquaintance with the world culture, the masterpieces of our national culture, their upbringing as physically healthy and spiritually mature. In addition to secondary schools, preschools, which are the primary part of public education, play an important role in fulfilling this task of national importance. An educator is a person with special pedagogical, psychological and professional knowledge and high quality. Therefore, a modern educator should be able to display the following qualities in the image of a coach. A modern coach must have a deep knowledge of his profession and work tirelessly. The educator should know the basics of pedagogy and psychology of preschool education, physiology, organize activities in the educational process, taking into account the age and psychological characteristics of children. The educator must be able to use effective forms, methods and tools in the educational process. Successful implementation of educational work depends on the correct organization of each type of pedagogical process in preschool education. The educator plays an important, honorable and responsible role in preparing our young generation to be worthy children of our people. The political maturity of the educator helps them to understand their responsibility to the people and society for the quality of upbringing, to take a creative approach to educational tasks, to constantly improve their skills and to grow their colleagues. Modern education requires educators and educators working in all types of preschool organizations to be creative. As in any profession, the foundation is laid during the student years for the creative abilities of future teachers, and they are constantly developed in the organization of professional activity.

It is important that the educator is self-directed and able to organize this activity effectively. An educator cannot be creative on his or her own. His creativity is formed by studying and working on himself over a period of time. As in any profession, the foundation is laid during the student years for the creative abilities of future teachers, and they are constantly developed in the organization of professional activity. It is important that the educator is self-directed and able to organize this activity effectively. In the organization of creative activity, the educator should pay special attention to solving problems, analyzing problem situations, as well as creating creative products of a pedagogical nature. When solving problems and situations, the educator's creative approach to finding a solution to the problem helps to develop in him the emotional and volitional qualities. By posing problems, the educator is confronted with evidence that contradicts his or her existing knowledge and life experiences. As a result, there is a need for self-study and independent study. The educator's research work and implementation of scientific or creative projects further develops his or her creative potential. The creative qualities of the educator direct his personal abilities, natural and social potential to the quality and effective organization of professional activity. creative approach to the organization of pedagogical professional activity with creative qualities, active in the creation of new,

advanced ideas that serve the development of children's learning activities, personal qualities, independent study of advanced pedagogical achievements and experiences, as well as , focuses on having a continuous, consistent exchange of views on pedagogical achievements with colleagues.

In short, the creative ability of educators is ensured, shaped, and gradually improved and developed through the pursuit of pedagogical problems, the implementation of research or research projects, and the achievement of mutual creative collaboration. In the organization of creative activity, the educator should pay special attention to solving problems, analyzing problem situations, as well as creating creative products of a pedagogical nature.
